About Us

Introduction The Research Group on Artificial Intelligence (RGAI) belongs to the Hungarian Academy of Sciences (MTA) and University of Szeged (SZTE) Informatics Departments. The predecessor of this group was established in 1969 and called The Research Group on Theory of Automata. But in 1996 the group was reorganized and since then has been led by Professor CSIRIK János. The RGAI pursues an active research and teaching programme in artificial intelligence and more generally in computer science. For more information please visit the page of the group: http://rgai.inf.u-szeged.hu/ [1]
