Research topics

- Robotics
  [more...][1]
- Hardware and software development of scientific instruments, sensors, wireless sensor networks
  [more...][2]
- Biomedical intrumentation and signal processing, measurement and analysis of heart rate and blood pressure fluctuations
  [more...][3]
- Educational open-source software, instrumentation, remote controlled laboratories
  [more...][4]
- Virtual instrumentation in education
  [more...][5]
- Noise, fluctuations and nonlinear phenomena
  [more...][6]

Publications of the employees of the department, [7]
