MSc in Computer Science

Title of the programme: Computer Science

Degree: MSc

Duration of the course: 4 semesters

Language of tuition: English

Description of the programme:

The aim of the program is to train Information Technology professionals who can perform the
development, creation, application, implementation, and operation of IT systems either individually
or as a team member at advanced level. Furthermore, it provides the cooperative and modelling
skills required to solve and research IT related problems, and ensures solid theoretical background to
pursue PhD studies.

The graduates are able to use problem solving techniques in the design and implementation of
enterprise resource planning systems; to apply state of the art modelling techniques; and to design,
implement, and operate decision support systems.

Main subjects: Graph Theory, Automata and Formal Languages, Application of Linear Programming,
Advanced Programming, Advanced Image Processing, Online Algorithms, Machine Learning
Algorithms, Advanced Graphics Algorithms, Advanced Approximate and Symbolic Computing,
Program Systems Development, Software Development, Logic and Functional Programming, Web
Technologies, Nonlinear Programming, Geographic Information Systems, Data Mining, Parallel
Programming.
