Final papers: April 14, 2003

The 7th International Conference Developments in Language Theory is organized by the Department of Informatics of the University of Szeged, Hungary. The conference is also under the auspices of the European Association for Theoretical Computer Science. Papers presenting original contributions in any area of language and automata theory are being sought. Simultaneous submissions of papers to any other conference that has proceedings are not allowed.

**Topics** of interest are (but are not limited to): grammars, acceptors and transducers for strings, trees, graphs, arrays, etc., algebraic theories for automata and languages, combinatorial properties of words and languages, formal power series, decision problems, efficient algorithms for automata and languages, relations to complexity theory and logic, picture description and analysis, DNA computing, quantum computing, cryptography, concurrency.

**Submissions:** Authors are invited to submit their papers (in English; up to 12 pages; if appropriate, proofs should be attached in an appendix) using the DLT 03 webpage

[www.inf.u-szeged.hu/informatika/dlt03/](http://www.inf.u-szeged.hu/informatika/dlt03/)

Submissions are to be made by February 24, 2003.

**Proceedings** will be published by Springer-Verlag in the LNCS series and will be available at the meeting.

**A special issue of TCS** containing selected papers will be published after the conference.
